Professional Summary

I'm a results-driven front end developer engineer with two years of combined corporate and freelance experience, currently delivering scalable digital solutions at Nucleus Cloud Limited. I bring deep expertise in front-end development, cloud-native systems. I thrive in fast-paced, collaborative environments and I am passionate about building reliable, efficient systems that solve real-world problem at scale.

Education

BSc in Computer Science, St Paul's University (2019- 2023)

Second Class Lower Division – GPA: 3.4

Professional Experience

Software developer- Nucleus Limited – Nairobi, Kenya (July 2025– Present)

- Developed, tested, and deployed responsive web applications, including a Fleet Management System, School Management System, and Enterprise Resource Planning (ERP) system.

- Spearheaded the development of a fleet management system that reduced missing delivery notes by 90%, improved real-time trip tracking, and streamlined logistics operations across the fleet.
- Collaborated with UI/UX designers, project managers and developers throughout the software development lifecycle to deliver scalable, user-focused solutions.
- Integrated front-end applications with RESTful APIs and back-end services to enable seamless data exchange across multiple platforms.
- Maintained source code using Git for version control, facilitating collaborative development and efficient release management.

Web developer – Shobill Group- Nairobi, Kenya (Jun 2024- Jan 2025)

- Developed and maintained a responsive real estate website ensuring seamless user experience across desktop, tablet and mobile devices.
- Designed dynamic property listing pages featuring land descriptions, pricing, locations, images and availability status.
- Integrated front-end components with back-end APIs and databases to retrieve and display real-time property information.
- Optimized website performance, responsiveness, SEO, and accessibility to improve page load speed and online visibility.
- Maintained source code using Git and participated in version control workflows for collaborative software development.
